

WASTE HANDLING ON THE ISLAND OD ŠOLTA

With an intention to develop and commit to a sustainable Integrated Waste Management, to collect the largest possible amount of usefull waste, to reduce the total amount of municipal waste and to improve the service, **we kindly ask you to separate your waste responsibly.**

The separate collection of recyclable waste comes only after the „reduce“ and „reuse“ steps. If valuable materials, such as paper, glass, plastic, metal, tekstil etc. are not separated at the source (in the household) but are mixed up instead, the opportunity to recycle them is irreversibly lost.

Our team in insland Šolta's utility company Komunalno Basilija d.o.o. dedicatedly works on improving the system of separate waste collection.

Thus, each facility (where possible) is assigned to an independent container for the removal of mixed municipal waste (green bin) while those facilities that can not be accessed by our vehicles are assigned to common containers or semi-underground containers.

Containers for mixed municipal waste were removed from all public areas and in each place of the island were formed the, so-called, „green islands“, with the containers for paper, cardboard, plastic, glass and metal packaging.

IT IS STRICTLY FORBIDDEN to dispose of mixed municipal (household waste) on public areas or anywhere on the island. Large waste (furniture, household appliances and other large waste) should not be disposed of on the formed „green islands“- they are EXCLUSIVELY for recyclable waste generated in households and intended for specific containers.

To dispose of large or bulky waste please call our office at 021/718 888 where you can get all the necessary information on further handling of the large waste.

WE KINDLY PLEASE ALL RESIDENTS AND VISITORS OF THE ISLAND OF ŠOLTA NOT TO DROP ANY TYPE OF WASTE ON PUBLIC AREAS NEAR THE CONTAINERS.

You can dispose of recyclable waste in containers for EXCLUSIVELY RECYCLABLE WASTE located on public areas (so-called „green islands“) on a daily basis.

The containers are iindicated for which type of waste they are intended for, and the color of the containers is also defined by the type of waste (blue for paper, yellow for plastic, gray for glass, black for metal).

It is not allowed to insert the bags for recyclable waste that you got from Komunalno Basilija d.o.o. into the specialized containers, nor to leave the same bags around the containers, but you have to bring them to the recycling yard or take them out for collecting on the days according to the schedule for collection of recyclable waste.

MIXED MUNICIPAL WASTE (GARBAGE)

Into a green box or container or semi-underground containers we dispose only the waste that can not be reused in any way . It is very important not to dispose a hazardous waste!

After separation of the whole usefull waste, the following waste goes into a green box, container or semi-underground containers: wet wipes, diapers, cotton, greased clothes and papers, sponges, razors, tobacco remains, hygiene pads, contents of vacuum cleaner bags, packaging not suitable for recycling food remains and other kind od waste that is not suitable for further use.

Boxes and containers for mixed municipal waste (garbage) will be emptied at the locations in your street once a week according to the schedule published on our website: <https://www.komunalno-basilija.hr/odvoz-komunalnog-otpada/>.

If you fill your green box of mixed waste and need emptying, according to our delivery schedule you will take it out to the agreed location so that employees of Komunalno Basilija d.o.o. know exactly that your green waste box has to be emptied.

If you need more that one emptying per week of your green box of mixed house waste, you can easily order additional pickups according to your needs, but only in season period: from 01.06.-30.09.

For arrangements and information please contact us at phone number: 00385 21 654 331 or send an inquiry to the e-mail: info@komunalno-basilija.hr

SEMI-UNDERGROUND CONTAINERS

On locations where we didn't have possibility to assign users their own containers, we installed semi-underground containers for disposal of mixed municipal waste (garbage). We applied this solution in Gornja Krušica, part of Maslinica (Tepli bok) and in the former apartment complex in the bay of Nečujam. In Nečujam they were placed in three locations: Street Dioklecijanova – near market Ribola and above the old kitchen of the recent restaurant – and in the Eugena Buktenice Street near the substation.

A large number of users/owners of apartments have already picked up their cards for opening the containers. Each disposal is recorded in our system through a system of WASTE ACCESS CONTROL (WAC) with a volume of 40 liter.

It is in the interest of every user to manage the WAC responsibly and to properly close it after disposing of the waste (gently, without force), because if it remains open, each subsequent disposal will be charged to an user who last opened the container.

Do not forcefully open or close the containers!

Mixed municipal waste (garbage) can only be disposed in the container by using the card to open the container:

1. Press the „start“ button“
2. Touch the card and wait for the container to open
3. Put away the garbage bag
4. Pull the handle to close the container

IT IS STRICTLY FORBIDDEN AND PUNISHABLE TO DISPOSE THE WASTE OUTSIDE OR NEXT TO THE CONTAINER!

We kindly ask you to follow the instructions and to properly dispose the waste to keep our island clean and beautiful. We also kindly ask those users that till now didn't pick up their boxes for mixed municipal waste or cards for opening semi-underground containers to come or contact us to pick it up.

RECYCLABLE WASTE

For proper separation of recyclable waste, Komunalno Basilija d.o.o. provided bags that you can pick up at our office in Grohote. Bags for recyclable waste are mandatory and free. In addition to them, if you wish, you can also get a boxes for paper, plastic and glass.

Waste collection schedule for mixed and recyclable waste you can find on our website: <https://www.komunalno-basilija.hr/odvoz-komunalnog-otpada/>.

The plastic bags will be collected according to the Schedule.

Users are obligated to put their bags with an recyclable waste next to their own container (box), or to the location that they previously agreed with our employees, by the 06.00 am on the exact day when by Schedule recyclable bags will be collected at your place.

If you need to dispose of the recyclable waste outside of the scheduled days, you can bring it:

- 1- to the recycling yard Borovik, located besides the main road close to Grohote (every day from 08.00 am to 2.00 pm except Sundays)
- 2- put the recyclable waste piece by piece in the containers located on so-called "green islands" that are provided for it.

It is not allowed to insert the bags for recyclable waste that you get from us for into mentioned containers, nor to leave those bags next to the containers!

The lids on the containers must be locked, so insert the packaging into the holes provided for it. Please do not try to open the lids by force!

SORTING OF HOUSEHOLD WASTE: PAPER

The PAPER WASTE you can discard in the BLUE containers located in public spaces, into your own blue box or bag.

What can be thrown into the BLUE containers for PAPER?

YES

- Newspaper, magazines, leaflets, catalogues, calendars
- Books with paper or cardboard covers, notebooks (but without spiral binding)
- Office paper, paper envelopes, letters, cardboard folders
- Clean paper bags
- Cardboard and a cardboard packaging (flattened and in smaller pieces).

NO

- Laminated, carbon or indigo paper
- Used paper tissues, napkins and diapers
- Used paper plates and cups
- Photos and a photo paper
- Damp or rotter, greasy and dirty paper or cardboard
- Books with laminated or leather covers
- Rubberized labels

SORTING OF HOUSEHOLD WASTE: PLASTIC

The PLASTIC WASTE, that is not part of the deposit-refund scheme, you can discard in the YELLOW containers located in public spaces, into your own yellow box or bag.

For PET packaging from drinks use the deposit-refund scheme in shop Studenac in Grohote, if possible.

What can be thrown into the YELLOW containers for PLASTIC?

YES:

- Plastic bottles of juice, milk, dairy products, water
- Plastic bottles of oil and vinegar
- Other plastic packaging, such as yogurt cups or margarine packaging (if washed)
- Disposable plastic cutlery
- Clean plastic bags and plastic, adhesive films, blister packaging
- Plastic things (eg children's toys, bowls etc)
- Bottles of personal hygiene and cleaning products, cosmetics, medicines (except cytostatics)
- TETRA-PAK packaging (must be rinsed and cleaned of contents)

REMARK: all plastic packaging should be washed from the rest of the content and, if possible, flattened.

NO:

- Packaging of motor oils and lubricants
- Packaging of dangerous and flammable substances

SORTING OF HOUSEHOLD WASTE – GLASS

The GLASS WASTE, that is not part of the deposit-refund scheme, you can discard in the GREEN/GRAY containers located in public spaces, into your own gray box or bag.

For glass packaging from drinks use the deposit-refund scheme in shop Studenac in Grohote, if possible.

What can be thrown into the containers for glass?

YES

- Empty glass bottles, jars (cleaned of the rest of the content without caps or leads), broken glasses (but not crystal!)

NO

- Mirrors
- Window glass
- Reinforced glass, fire-resistant glass
- Crystal
- Porcelain
- Light bulbs
- Medical and laboratory glassware (ampoules, test tubes)

SORTING OF HOUSEHOLD WASTE – METAL WASTE

The METAL WASTE you can discard in the black containers located in public spaces or into your own pink box or bag. What can be thrown into the containers for metal?

YES

- Cans, metal caps and lids (packaging should be washed and, if possible, flattened)
- Aluminium foil

NO

- Metal packaging with remnants of paint, varnish or other flammable substances
- Metal packaging of deodorants and other pressurized sprays

SORTING OF HOUSEHOLD WASTE – ORGANIC/ BIOWASTE

Organic waste/biowaste such as: remains of vegetables, fruit, potato skins, coffee grounds, tea bags, egg shells, cooled ashes, animal hair and feathers, toothpicks, skewers, kitchen waste (except for cooked food) you can compost in home composter or in your own garden and you will get quality fertilizer, and in the same time you will reduce the amount of waste that you normally put into the mixed municipal waste.

If you do not have the option of composting, put your organic/biowaste from the household in your box or container for mixed municipal waste.

Larger green waste, such as grass, leaves, twigs and other similar garden waste generated in gardens and in the households, if you are not able to dispose of it by yourself, you can order from us a shredding service on your plot (with our machine for shredding green mass), after which you will have quality wood chips that you can further use as a humus.

For green waste and other biowaste from your garden on our web page www.komunalno-basilija.hr, you can find instructions how to compost and reuse it for your garden.

IMPORTANT: THE FOLLOWING TYPES OF WASTE MUST BE DELIVERED PERSONALLY TO AN AUTHORISED PERSON AT THE „BOROVIK“ RECYCLING YARD:

- EE (electrical or electronic) waste (large and small household appliances, telecommunications and IT equipment, electrical tools, lighting equipment etc.)
- Bulky waste (furniture, floor coverings, bathroom equipment, garden equipment, awnings, doors, window frames, exercise equipment, radiators, buckets, wheelchairs, ironing boards etc.)
- Hazardous or flammable waste (medicines, residues of plant protection agents, disinfection, disinsection, varnishes, solvents, rust, paint or varnish removers, wood preservatives, oil filters, thermometers with mercury, antifreeze, pressurized bottles, adhesives, photochemicals and similar.
- Batteries/accumulators
- Motor and edible oils
- All types of clothing (t-shirts, sweaters, trousers, jeans, skirts, coats, jackets, underwear, socks), footwear (shoes, boots, sandals, sport shoes, flip flops, clogs) or some third type of textile (automotive upholstery, work overalls, clean cloths, textiles etc)

All our users who properly fulfill their obligations have the right once a year, in the period from 01.10. until 01.06. (out of season), to order a free removal of the above-mentioned waste in the amount of up to 5 m³.

SMALL PRIVATE RENTERS HAVE AN OBLIGATION TO INFORM THEIR GUESTS ABOUT THE SYSTEM AND METHOD OF WASTE HANDLING ON THE ISLAND OF ŠOLTA AND ENABLE THEM TO DISPOSE WITHIN THEIR FACILITY ADEQUATELY.

HANDLE WASTE RESPONSIBLY!

REDUCE - RECYCLE - REUSE
